Research Interests	My research focuses on how countries shape new rules and governance for emerging technologies using both quantitative and qualitative methods. The main streams of my research include 1) theoretical bases to build international governance for emerging technologies with a focus on artificial intelligence (AI); 2) states' behavior when there is no clear rule in a realm; and 3) applying new research methods including large language models (LLMs).

Education	Georgia Institute of Technology, Atlanta, GA	
	Ph.D. in Public Policy	August 2020 -
	Georgia Institute of Technology, Atlanta, GA	
	M.S. in Statistics	August 2020 -
	Seoul National University, Seoul, Korea	
	M.A. in International Affairs	June 2016
	Sungkyunkwan University, Seoul, Korea	
	B.A. in Political Science/International Trade	June 2009
